Bob,

I guess I had to get off the line this morning before this part of the conversation occurred. While I agree that it would be optimal to have the technical conversation with the state prior to Monday, it may not be feasible. We will try to make it work tomorrow, but I am not inclined to ask Ayn to alter her planned furlough day, particularly since she interrupted her last period of annual leave to attend the meeting in Cheyenne.

We are doing everything within our power to help move this process along.

Thanks,
Howard

Remember that Jerimiah wants to meet with encana on monday. Surely we want the call before then?

We talked to Jerimiah abt a technical call on the additional contaminants and then possibly a broader call to get feedback on the issues we raised with him today. Ayn would be key for the first call but her furlough day would preclude her participation.

Bob,

I could make it for 30 minutes at 11:00 EDT. The other time tomorrow doesn't work for me, but I think Ayn is the key here.

What meetings are you referring to on Friday?

Thanks,
Howard

I think we're running into roadblocks at this time. My best shots tomorrow are 11-12 and 1:15-2:15 EST. (Don, the OW mtg is being cancelled). Failing these times, late afternoon, 6ish, is the other alternative. And if nothing works tomorrow, we can try Friday am, before the calls with Wyoming.

Tomorrow is gruesome looking schedule-wise. We could make 12:30 to 1:30 work if we need an hour, but Howard may not be able to join us for the beginning of it. If you think we can complete a conversation in 30 minutes, then we could start at 1:00...all times MDT.

Boss (aka Don)Any chance of this working?

Any success in lining up a call tomorrow with Ayn et al on technical issues?
